

4TH CYBERSEC BRUSSELS LEADERS' FORESIGHT

18 MARCH 2021 ONLINE

SUMMARY

Dear Friends,

The 4th edition of CYBERSEC Brussels Leaders' Foresight has just come to an end. Our team would like to sincerely thank all of you for your trust and support. Without your contributions this event would not have been possible.

Crafting this year's agenda was exceptionally challenging as we are in a moment when we, as the global community, are forced to take urgent decisions in response to the coronavirus crisis, that will define the upcoming decade. At such time it is critical to engage in an open debate on the fundamentals of digital transformation to be able to make choices that will steer the technological developments and help us navigate towards the digital future that will protect and strengthen our shared values rather than undermine them. We believe that this time in particular encourages discussions that can turn into effective cooperation among like-minded partners across different sectors. With you on board, we are sure that this project and its next editions will be just as successful as this one.

We are immensely proud that so many experts and decision-makers representing various fields and backgrounds agreed to support CYBERSEC by sharing their fascinating experiences and much-needed insights. Your trust in our project made all of this possible.

CYBERSEC Brussels Leaders' Foresight 2021 was enriched with plenty of timely and thought-provoking conversations on the challenges and opportunities related to the everchanging nature of cyberspace. The key takeaways from each of them will be compiled in a separate publication, which will be shared with you in the upcoming weeks. Some of the topics will be further elaborated on during our future events, including the CYBERSEC Global 2021.

We are forever grateful to our Partners – leading global and European companies, who are shaping the digital world to be resilient, secure and united, for their contribution to our initiative. We hope that you enjoyed CYBERSEC Brussels Leaders' Foresight 2021 just as much as we did and that we will be able to continue our fruitful cooperation in the future.

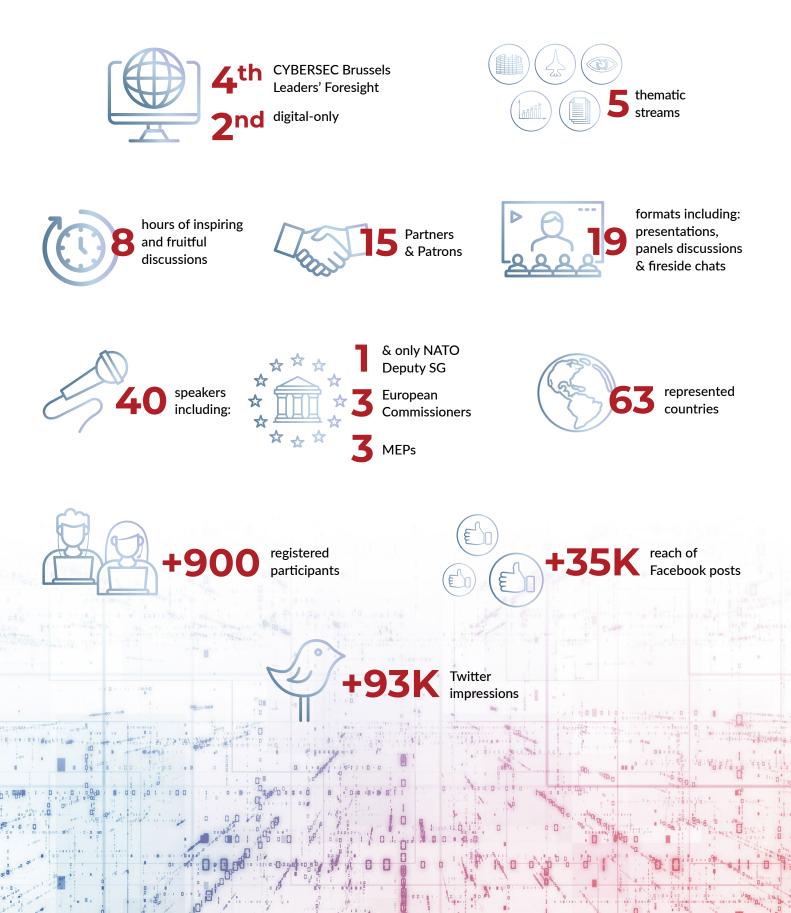

Thank you for standing with us, Together Against Adversarial Internet.

THE #CSBXL21 NUMBERS

COUNT FOR THE BIGGEST CYBERSEC BRUSSELS EDITION EVER

CYBERSEC BRUSSELS 2021 THROUGH THE LENS

Izabela Albrycht – Chair of the Kosciuszko Institute and the European Cybersecurity Forum – CYBERSEC Organising Committee

Michał Rekowski – Research Director, CYBERSEC Programme Director

AMONG CYBERSEC BRUSSELS 2021 SPEAKERS

MIRCEA GEOANĂ Deputy Secretary General, NATO

MIAPETRA KUMPULA-NATRI Vice-Chair, Delegation for relations with the United States, European Parliament

JUHAN LEPASSAAR Executive Director, ENISA

CASPER KLYNGE Vice President, European Government Affairs, Microsoft

JOSEP BORRELL FONTELLES High Representative of the Union for Foreign Affairs and Security Policy; Vice-President of the European Commission

JONATAN VSEVIOV Secretary General, Ministry of Foreign Affairs, Estonia; Former Ambassador of Estonia to the United States

JOANNEKE BALFOORT Director, Security and Defence Policy, European External Action Service

RAJ SAMANI Chief Scientist, Fellow, McAfee

MARGARITIS SCHINAS Vice-President for Promoting our European Way of Life, European Commission

MAREK ZAGÓRSKI Secretary of State, Chancellery of the Prime Minister of Poland

LORENA BOIX ALONSO Director, Digital Society, Trust & Cybersecurity, DG CONNECT, European Commission

MARTA POŚLAD Head of CEE & Transatlantic Public Policy, Google

DIDIER REYNDERS Commissioner for Justice, European Commission

MICHELE G. MARKOFF Acting Coordinator, Office of the Coordinator for Cyber Issues, Office of the Secretary of State, United States Department of State

LEON PANETTA Chairman, The Panetta Institute for Public Policy; Former U.S. Secretary of Defense

PIOTR KARNKOWSKI Managing Director, Financial and Capital Markets Division, Polish State Development Bank; Chairman of the Management Board, Three Seas Initiative Investment Fund

OPENING

"There are at least four important dimensions which transatlantic partners should address to avoid heading to the adversarial Internet world:

no. 1: reinforce cybersecurity agendas to address the increasing numer and sophistication of cyberattacks,

no. 2 cooperate on advances and technological breakthroughs in AI, 6G, quantum technologies as well as in the reorganisation of digital supply chains in a way that will strategically contribute to resilience,

no. 3 develop the technologies in a way which positively impact our geopolitical and geoeconomic position and no. 4 make sure it all will be in line with our democratic values."

CYBERSEC Brussels 2021 kicked off with an address from the High Representative of the Union for Foreign Affairs and Security Policy and Vice-President of the European Commission – **Josep Borrell Fontelles.** In his speech, he emphasized the importance of new EU regulatory proposals, such as the new cybersecurity strategy, which "will help us defend our vision of an open, stable and secure cyberspace; to use our political clout; to ensure adherence to norms of responsible behaviour; and to deter and respond to cyber-attacks."

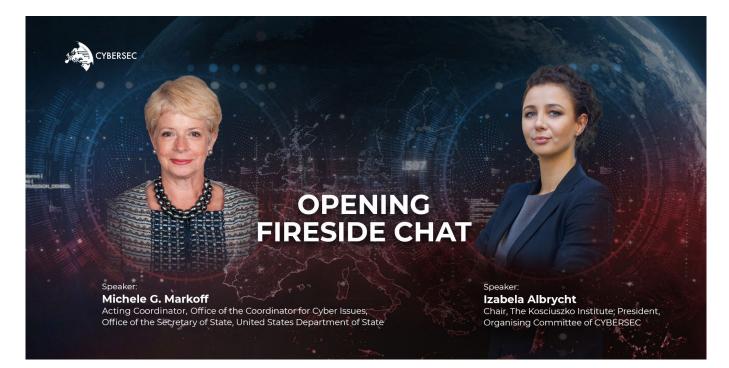

Keynote Speech OPENING KEYNOTE

CYBERSEC

Speaker: Josep Borrell Fontelles High Representative of the Union for Foreign Affairs and Security Policy, Vice-President of the European Commission

This message was echoed by **Michele G. Markoff**, Acting Coordinator for Cyber Issues at the US Department of State, who underlined that the United States is "committed to investing in the sources of our technological strength and pursue a comprehensive strategy to address the full range of cyber issues. We intend to partner with the EU and others, like-minded, to amplify our collective strength."

The transatlantic cooperation has been one of the key elements of the conference, also regarding the use of new technologies to maintain the technological edge over authoritarian states. As Deputy Secretary General of NATO **Mircea Geoana** said, "NATO should be the global driver of a values-based approach to defence innovation, to make sure that global rules and norms are shaped by our values – freedom, democracy, the rule of law – and not by those who seek to undermine them."

This cooperation should be both international and cross-sectoral – because we are all in this together. As **Joshua Burch**, Senior Managing Director and Head of Cybersecurity for the Europe, Middle East, India, and Africa Region at FTI Consulting pointed out, "online is the new frontline with increasingly sophisticated and complex threats coming at all of us from a range of threat actors, no organisation is impenetrable. By thinking about your cybersecurity resilience, and taking steps to prepare, you're already one step ahead."

Keynote Speech

HOW ORGANIZATIONS SHOULD ADDRESS CYBERTHREATS IN THE ADVERSARIAL ONLINE WORLD

Speaker:

CYBERSEC

Joshua Burch

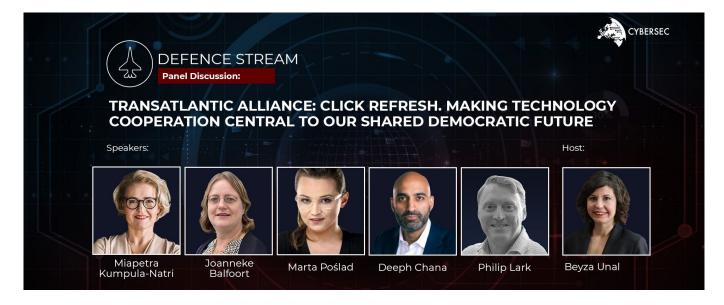

Senior Managing Director, Head of Cybersecurity for the Europe, Middle East, India, and Africa Region, FTI Consulting

Following the 2020 US presidential elections, European leaders articulated their hopes of a **transatlantic revival** under the new administration. EU's High Representative has called for an establishment of both an EU-US Security and Defence Dialogue and a technology alliance spanning across the Atlantic. As emerging and disruptive technologies (EDTs) present a formidable challenge to transatlantic security and defence, NATO has undertaken to establish a comprehensive framework specifically for that. The momentum for a new opening of strategic cooperation between the US, NATO and the EU has arrived, one that will lead the Allies to maintain technological edge in security. This cooperation should not overlook issues like harmonization of export controls, protection of technology transfers and Intellectual Property, joint R&D&I, and curtailing the spread of authoritarian practices enables by new technologies. In this respect, we need a strategic dialogue on technology, security and ethics that will contribute for an epochal rejuvenation of the transatlantic relation, enabling another 70 years of peaceful and democratic coexistence.

STATE STREAM

Cybersecurity, cyber resilience and technological command are critical for Europe's **digital sovereignty and strategic autonomy.** The two concepts, with the former being an element of the latter, signal European Union's ambition to achieve relative freedom to navigate its own course and shape its fate in digital affairs, whether that refers to a tighter regulation of digital platforms, better protection of the European domain system, greater independence in supply chains or a more solid cybersecurity of the industrial systems. From the Data Governance Act to the Cyber package, the recent legislative proposals by the European Commission are exemplifications of this aspiration. But as in the EU the sovereignty has been hitherto largely restricted to the Member States, how can we understand the concept of 'technological sovereignty' in the European context? How can we operationalize it while creating new laws and legal instruments to provide tighter cybersecurity of our assets and control of our data? Can the concept serve as a key to overcome functional obstacles and fragmentation that hampered EU's cybersecurity policies in the past? Should we seek for a greater legal embedment of strategic autonomy as a way to carve digital policies that will transcend all sectors critical to the functioning of our social life?

EU DIGITAL POLICY FORESIGHT

Despite the 2020 being extremely eventful in terms of the European Commission's digital initiative, the work is hardly finished yet. As Commission has set out a recovery plan for the post-COVID-19 Europe, it undertakes to rebuild the Union that is greener, more digital and more resilient. This goes in line with its **'Europe fit for the Digital Age'** agenda, containing many projects and initiatives tackling various aspects of the EU's digital ecosystem. Many topics like artificial intelligence, digital identity or upgrade of industrial strategy are going to be addressed throughout 2021. In this special stream we will focus on specific regulations and digital policies on the European horizon. How will they affect the regulatory landscape of the Union? What are the next steps?

Keynote Speech

CYBERSEC

ENISA'S ROLE IN THE NEW&UPGRADED CYBERSECURITY ECOSYSTEM

Speaker: **Juhan Lepassaar** Executive Director, ENISA

Speaker: **Casper Klynge** Vice President, European Government Affairs, Microsoft

Fireside Chat

DISCUSSING EUROPE'S CYBER RESILIENCE IN FACE OF NEW THREATS

Speaker: Dan Cimpean General Director, Romanian National Computer Security Incident Response Team (CERT-RO) Speaker: Michał Rekowski CYBERSEC Programme Director, Research Director, the Kosciuszko Institute

FUTURE STREAM

Data is the air that the digital world needs to breathe and its exponential growth proves how rapidly we are digitally transforming all domains of our social and personal lives. However, data can also be subjected to misconduct regarding privacy, citizens' rights, democratic processes and even to human rights abuses. Despite its air-like features, data still has to be stored physically (and therefore be geographically located), prompting calls for greater data localization and protection. **Data transfers** between the EU and entities outside are one of the bigger bones of contention, also for the transatlantic relationship. In 2020 we saw the European Court of Justice invalidate the Privacy Shield, a base for the transatlantic data transfers between the EU and the US. It was accompanied by new regulations, like the Data Governance Act proposed by the European Commission requiring data sharing intermediaries to appoint a legal representative in an EU member state that will be accountable to laws and authorities of that state. Europeans have also speed up their efforts to establish a European federated cloud under the name GAIA-X, in order to achieve greater sovereignty. How can politicians, entrepreneurs and privacy activists on both sides of the Atlantic navigate this evolving landscape and not lose sight of the common direction that is the revival of transatlantic relationship? Should we establish a data ocean, where pooling and sharing of data would be done with respect to rules and values acceptable to all involved?

The recent 2020 3SI Summit in Tallin strengthened the Initiative's focus on the digital pillar that aims to augment digital connectivity linking transport and energy infrastructure in the region. It was also followed by the Resolution adopted in the U.S. House of Representatives that expressed support for the **Three Seas Initiative** and reaffirmed financial backing to its projects. We have arrived at an unprecedented momentum that can provide for a more profound digital transformation in Central and Eastern Europe. As the 3SI Fund has made its first investment in Greenergy Data Centers, it is vital not to lose the impetus and to undertake other priority digital projects, including the 3 Seas Digital Highway – invented and conceptualized by the Kosciuszko Institute and steadily promoted by CYBERSEC over the last 2 years. Deployment of state-of-the-art digital infrastructure will bring multiple advantages to the region: from creating more digitally-empowered business opportunities to scaling them up to a regional scale. As the Three Seas Region forms the EU's gateway to the greater Eurasian continent, developing the Three Seas digital pillar is indispensable for building Europe's resilience vis-a-vis. The 3SI is therefore directed towards enhancing the EU's cohesion and convergence, and additionally will serve as a key element of the strategic revival of the transatlantic relationship.

SOME OF CYBERSEC BRUSSELS 2021 IMMEDIATE RESPONES

Josep Borrell Fontelles @JosepBorrellF

https://twitter.com/JosepBorrellF/status/ 1372512513112309766

EU needs to be fit for digital age. New Cybersecurity Strategy brings together regulatory, policy and investment instruments to strengthen EU's resilience, security, digital sovereignty and prosperity. My intervention at CYBERSEC Brussels Leaders' Foresight 2021 #CSBXL21

Mircea Geoana

@Mircea_Geoana

https://twitter.com/Mircea_Geoana/status/ 1372492083144097792

Important discussions at @CYBERSECEU. #NATO should be the global driver of a values-based approach to defence innovation. We must work closely together so that we can foster an innovation eco-system that ensures we keep our almost 1bn people safe.

DIGITALEUROPE @DIGITALEUROPE

https://twitter.com/DIGITALEUROPE/status/ 1372548080776667136

We're at @CYBERSECEU's #CSBXL21 today to speak about the future of transatlantic data flows. Our #SchremsII survey shows that 9 in 10 European companies share data outside the EU and 85% rely on #SCCs to do so.

BGK @BGK_pl

https://twitter.com/BGK_pl/status/ 1372589380439838726

Piotr Karnkowski, CEO #3seas Investment Fund @CYBERSECEU: We support construction of a modern&secure technological infrastructure, because it encourages domestic and foreign investment and facilitates regional expansion of 3seas companies & know-how exchange. #3SIIF #CSBXL21

Forsal.pl @forsalpl

https://twitter.com/forsalpl/status/ 1372586251015032834

Kiedy mówimy o cyberbezpieczeństwie, musimy pamiętać, że to przedłużenie sojuszu militarnego. Bez silnej współpracy ten sojusz tradycyjny, militarny, będzie niepełny - ocenił @ZagorskiMarek z @CyfryzacjaKPRM w czasie @CYBERSECEU

Miapetra Kumpula-N @miapetrakumpula

https://twitter.com/miapetrakumpula/status/ 1372486356778246148

More important than ever that the #EU and the #US cooperate closely together on emerging and disruptive technologies to retain the technological edge over authoritarian states. Some decoupling from #China might be needed. #CyberSec

Michael Nelson

@MikeNelson

https://twitter.com/MikeNelson/status/ 1372473709332721666

"Online is the new front line." Some useful, practical advice on dealing with the new #cybervulnerabilities caused by #COVID19. Ransomware, medical scams, phishing at-home workers, etc. #CSBXL21 #cybersecurity

Trójmorze @trojmorze_pl

Stawiamy na budowę nowoczesnej i bezpiecznej infrastruktury technologicznej – mówił podczas konferencji @CYBERSECEU Piotr Karnkowski z @BGK_pl, prezes Funduszu Inwestycyjnego Inicjatywy #Trójmorze (#3SIIF).

GFCE

@theGFCE
